

Effective segmentation

Obtaining data on client value template

Before you can categorise your clients using a customer segmentation matrix, you will need to collect and tabulate your client value data.

The worksheets that follow can be used to guide this process, and you can amend these as you wish to suit your company's objectives and strategies.

The first worksheet will enable you to refine your client segments and sub-segments. The second worksheet will enable you to tabulate your client value.

Regularly update and refine these templates as you gather more data and insights about each segment, allowing you to adapt your services and strategies effectively.

Worksheet 1: Understanding your client segments and sub-segments

When considering your client base, you can use the table below to fully determine each segment of your client base. Once you have completed this, you can summarise the most critical insights and findings for each segment. These key takeaways will help to inform your strategies and decision-making in managing and growing each segment.

1. Demographics

Describe the demographic profile of this segment. Are there any common characteristics such as age, gender, location or occupation?

Are there any sub-segments that you allocate these clients to? This could include: Wealthy retirees/ Pre-retirees/ Fast saving individuals

Describe a typical member of each sub-segment. For example: What are their interests? What is their income and expenditure pattern? What type of investor are they?

2. Client behaviours - complete a new template for each sub-segment

Sub-segment name:

What	products	s or servi	ces does	S CHIS SUL		ic riccu.						
How d	loes this	sub-segr	nent typ	pically int	teract wi	th our co	ompany?					
s the	servicing	cost of	the sub-	segment	t low, me	dium or	high?					
What	percento	age of sto	aff time	would yo	ou estim	ate this s	sub-segr	nent use	s?			
Does t	this sub-	segment	place aı	ny specif	ïc demar	nds on th	ne busine	ss?				
Does t	this sub-	segment	create (any speci	ific risks	for the b	ousiness?					
Rating	g out of 1			rate how				mands o	of this su emands 0% met	ıb-segmen	t?	
Rating	g out of 1			rate how	w we me			mands o	emands	ıb-segmen	t?	
Pating Pemano ot met	g out of 1 ds	0, how w	vould we	rate hov Some m	w we me ewhat et 6	et the sp	pecific de	mands o	emands 0% met ——	ıb-segmen	t?

Rating Demand not met 1 3. O s this Are rev What	g out of 1 ds t 2 pportu sub-segu	0, how was	owing or	trate how Some me 5 5 declining client like in this su	w we me ewhat let 6 g?	et the sp	ecific de 8 n future?	mands of D	s sub-se		t?	

Worksheet 2: Client value table

When referring to client value, the key data you will need for each client is the revenue they produce for the firm. When this data has been collated, start to tabulate it into quartile or decile rankings, adding it to the table.

	QUARTILE 1	QUARTILE 2	QUARTILE 3	QUARTILE 4
	Top 25%	2nd 25%	3rd 25%	Bottom 25%
	firm revenue	firm revenue	firm revenue	firm revenue
Clients				
How many clients				
are in this quartile?				
% of total clients				
Client value				
What is the lifetime				
value (LTV)¹ of				
these clients?				
What loyalty score				
does this quartile				
achieve?				
What is the client				
loyalty value (CLV) ²				
of the quartile?				
Asset values				
Highest Asset Value ³				
Lowest Asset Value				
Average Asset Value				

¹ LTV = the total of the net present value of anticipated future cash flows (revenue minus costs) of an individual client. See <u>Understanding Client Value</u> for a full explanation.

² In brief, Client Loyalty Value can be calculated as: Customer Loyalty Value (CLV) = Loyalty rate x LTV. See <u>Understanding Client Value</u> for a full explanation.

³ See <u>Effective Segmentation</u> for more information. Highest Asset Value can be defined as the highest net worth or value that your client's investment portfolio has reached over a given period of time. Lowest Asset Value would denote the lowest net worth of your client's investments and the average should be calculated.

Investment risk information

The value of investments, and the income from them, may fall or rise and investors may get back less than they invested.
